Welcome to our brand guidelines file. These guidelines help distill what we stand for, the way we speak, how we look, and what the world can consistently expect from us. Above all, they unify the complex nature of our brand assets and help us stay true to our values and put them at the heart of every decision we make to facilitate the youth’s capacities and abilities in Jordan and their journey towards prosperity.

What will these guidelines help CPF do?

- Reflect His Royal Highness Crown Prince Al Hussein bin Abdullah II's dedication to securing a prosperous future for youth of Jordan.
- Ensure that the themes are present in all communications.
- Ensure all CPF’s touchpoints are consistent.

You should find everything you need to create for CPF’s different brand touchpoints in this file. You can also access source files and brand assets in the download center. Please we urge you to treat it with respect.

Our brand philosophy serves as a reminder of who we are, what we stand for, and gives us a sense of purpose. The eternal question that guides everything we do is, "How can we serve youth of Jordan better than we did yesterday?"

We've grown hand in hand ever since we opened in 2015 to the public. And to this day, we continue work on increasing the engagement of youth in community service, assume leadership responsibilities, and maximize all available social and economic opportunities to embody His Royal Highness's belief that youth in Jordan are capable of the greatest achievements if given the opportunity to fulfill their role as active citizens in the development process.

Today, we serve a broader and more diverse range of Jordanian youth from all governorates towards prosperity.

Our areas of work:

- Pathway to Economic Participation | مسار المشاركة الاقتصادية
- Pathway to Leadership | مسار القيادة
- Pathway to Sustainable Community Development | مسار التنمية المجتمعية المستدامة

Our logo captures the essence of our identity and is the most recognizable symbol of our brand. So, it's crucial to use the logo as specified in these guidelines to make sure it always looks its best on every touchpoint.

You'll notice several variations of the logo, but we have a few preferences that you should keep in mind:

- The Arabic version is our primary brand mark. Always start by asking whether the Arabic icon would do. In most cases, it should, but we understand that it might not be ideal in some situations.

This is our approach for choosing the most appropriate version of our logo:

- Identify language of your touchpoint
- If your communication touchpoint is entirely in Arabic, use the Arabic logo.
- If your communication touchpoint is entirely in English, use the English logo.
- If your communication touchpoint is bilingual, use the bilingual logo.

The logo of the Crown Prince Foundation is a strong reflection of the Foundation's mission to empower youth and build a better future for Jordan. It is a reminder that the Foundation is committed to working with youth to achieve their full potential and create a better future for all Jordanians. A bright design and bright colors were chosen that will stand out easily and be easy to remember. A modern and simple style was also used that reflects the organization's commitment to innovation and progress.

Logo Derivers:

- The seven stars of the Jordanian flag were chosen as the basis for the logo because they signify hope, unity, and perseverance.
- The arrows symbolize the foundation's vision for a brighter future for Jordan. And the interconnectedness of the arrows symbolizes the commitment of the foundation to collaboration and partnership with youth.
- The foundation believes it can accomplish its objectives by utilizing innovative concepts and technologies..

You can use our patterns as a visual element that can strongly support your designs. These are our versions of primary patterns:

Our patterns, just like our colors, are quite flexible. Here are some things to keep in mind:

- You have three variables to play with: pattern size, color overlay, and opacity
- Use the right combination of these three variables that best fits your design
- Don't use color overlays outside of our color palette
- Try to stay within a 50-100% opacity range
- Always make sure there's enough contrast between the pattern and other visual elements (e.g. logo, photography, copy...)
